

One bad
sunburn before
age 18
doubles your
skin cancer risk.

DON'T YOU? KNOW ■

UV rays and sunburn cause skin cancer.
Save yourself. Save your friends. Ban sunburn.
Use sunscreen whenever you're outdoors.

Get the message. Ban sunburn.

DON'T YOU? KNOW ■

Skin cancer
kills more young
women than
any other cancer.

UV rays — even in a tanning booth — age your skin and cause skin cancer. All tanning damages your skin, and getting a “base tan” won’t protect you. Save your skin. Ban the tan.
