

# LUNG CANCER SYMPTOMS

**Early lung cancer may not show any symptoms.  
Some symptoms that could be present include:**

- Constant chest pain
- Cough that does not go away and continues to get worse over time
- Fatigue (tiredness)
- Coughing up blood
- Shortness of breath
- Wheezing and hoarseness (strained voice)
- Loss of feeling hungry and losing weight without trying
- Repeated problems with pneumonia or bronchitis
- Neck and face swelling
